

# **How Basic Research on Surfaces led to a Nobel Prize and a Revolution in Metrology**

**Klaus v. Klitzing**

Max Planck Institute for Solid State Research  
D-70569 Stuttgart

The Quantum Hall Effect (QHE, Nobel Prize 1985) was an unexpected discovery starting with the analysis of unwanted contributions of surface effects.

The talk summarizes the success story of the application of the QHE in metrology, which led finally to a revised international system of units worldwide introduced on 20.5.2019.
